## **BC Hydro Employment Opportunities.**

We have started the 'request for proposals' process for construction of the Seymour Arm Series Capacitor Station. We hope to select a general contractor sometime in the next few months. BC Hydro would like to strongly encourage the contractor to hire locally and use local services.

Applicants who have services to provide (accommodation, heavy equipment etc ) or may be seeking employment opportunities; can send me an email ([gene.bryant@bchydro.com](mailto:gene.bryant@bchydro.com) ) with;

1. name and contact info
2. list of services or equipment that they can provide
3. for employment, an indication of their trade or area of expertise (no resumes required)
4. their approval for BC Hydro to release their contact information publicly to the identified contractor list
