Road Update:

Friday April 27, 2012

The Seymour Arm main road grading has been completed and is a wonderful road again for travel. There are a few potholes (minor) and this leads to much faster trips. Please ensure all drive safe.

The town roads have had some work done and are much improved. Lots of rain, let's hope the roads stay good.

Also I have heard that there will be some log loads coming off the 300 road after spring breakup.

I have also heard that we will be getting another coating of calcium. Hopefully after the logging so we have wonderful roads all summer.

Will update after the logging restarts.
